

FWA Systems *established 1973*

WHY FWA SYSTEMS?

Over 30 years of continuous trading gives customer reassurance. Strictly honest trading policy - we want to build long term trading relationships and ensure customers safety in dealing with us. Engineering oriented with no forceful Salesmen - you can talk freely about projects without unwanted sales pressures. Our company philosophy guarantees high quality systems and low prices.

WHAT DO WE DO?

We design, supply, install and maintain a wide range of Sound, CCTV, Security Communication and Audio Visual Systems - in THREE SPECIFIC PRICE RANGES to meet customers' requirements.

PRODUCT CHOICE

FWA Systems is not tied to any manufacturer. This means we always select the "best of breed" and ensure that our customers are always offered our latest product developments.

PRICE GUARANTEE

Should any competitor produce a bona fide like for like quotation at a lower price than ours, we will guarantee to reduce our price to below that of the competitor. We need your feedback to maintain our competitive purchasing edge.

MAKING OUR PRODUCTS FIT CUSTOMERS NEEDS

We have a broad product range for the differing applications which we regularly deal with. Not only does this provide a One Stop Shop, but also means that we tailor our systems to customer requirements, rather than forcing the customer to mould their requirements to the available products.

ADVICE AND SPECIFICATION SERVICE

Whenever required we offer the service to provide system, product & design advice, as well as answering "what if" questions. Additionally, we write specifications for your projects.

FINANCIAL OFFERINGS

Outright purchase, longer-term rental, lease, maintenance
